

- USER SELECTABLE WINDOW TEXT
- THREE WARNING LEVELS
- CLEAR INDICATION OF INCREASING HAZARD
- SLAVE RELAYS FOR FURTHER OPERATIONS
- ROBUST AND WEATHERPROOF

The Status Indicator is a remote module lending itself to a wide variety of warning and alarm applications. The module provides three user selectable levels of alarm, each having varying audible tones with 'text selectable' illuminated window indications. The sounder may be muted at any time with the flashing LED indicators going constant but remaining lit until the alarm condition has cleared. Three relays are available for further repeater or control actions, these relays may be selected to reset with the sounder or remain on with the indicators.
