General features

- Multisensors device for continuous physical, chemical and perception data collection.
- 3G and 4G connection.
- Alarm mode on all measurement channels (triggering thresholds).
- Information via LED color changes.
- On line and storage of data for 48 hours via data logger.
- Software on secured servers and on line update.
- Communication via WIFI, LoRa (Long Range), LTE or Ethernet. Wifi is preferred for high level of data transfer.
- Data frequency : from 1 data set every 10 seconds.
- Odor data banks (Musty, solvents, cigarette, sewer...).
- 44 possibilities of subjective perception reporting via QR Code attached to each module.
